📅 2018

PROJECTS

Chatbot System for Crime Awareness

- Our Legal Chatbot represents a groundbreaking leap in legal assistance, providing instant support on crime awareness. With its advanced natural language processing capabilities, our device can address inquiries in real-time, delivering personalized solutions to individual needs. Studies indicate that users experience reduction in time spent on legal research and consultations, translating to an average time savings of 3 hours per inquiry. Additionally.

E- COMMERSE WEBSITE

- Designed and implemented E-commerce website application in 4-person team.
- Enabled reusable component libraries, reducing fronted development time by 30% and saving the team an average of 10 hours per week.
- Integrated automated notifications system to alter users of test results, ensuring timely communication and reducing manual followup effort.
